Assignment 01: Evaluate the GDP Dataset

The comments/sections provided are your cues to perform the assignment. You don't need to limit yourself to the number of rows/cells provided. You can add additional rows in each section to add more lines of code.

If at any point in time you need help on solving this assignment, view our demo video to understand the different steps of the code.

Happy coding!

1: View and add the dataset

In [3]:
```
#Import required library
import numpy as np
```

In [7]:
```
#Manually add the dataset

Out[18]: 'Ethiopia'

4: Print out text ('evaluating country') and input value ('country name') iteratively

In [19]:
```
#Use a for loop to print the required output
for country in countries:
    print('ecaluating country{}'.format(country))
```
